

Fast and precise measurements.

In the food sector, temperature measurements are one of the routine daily jobs. Only by taking precise measurements can you monitor and guarantee the quality of your products. And it is the only way to fulfil the HACCP regulations. With the testo 108 series, this is child's play.

The testo 108 series allows spot check measurements in seconds. Whether in the transportation and storage of food-stuffs, in restaurants, in large kitchens or in chain restaurants. If you want to measure temperature, this instrument is all you need. It allows temperature measurement to be integrated into daily work routines with no added complications. And you do not have to worry about the obligatory HACCP regulations.

0981 9594/dk/Q/01.2013 Subject to change without notice.

What exactly can a Testo handle? Anything.

testo 108 series. Fast, easy and precise temperature measurement

Versatile application.

Easy handling.

You will enjoy working with the testo 108 series. The large display and the easy operation with two self-explanatory buttons guarantee that even untrained staff will be able to carry out measurements quickly and safely.

The advantages of testo 108 series:

- Easy operation and handling
- Instrument and probe are waterproof (IP67)
- Includes softcase and probe
- Conforms to HACCP and certified according to EN 13485
- Measures quickly, accurately and easily

The testo 108-2 proves its worth especially in tough surroundings. It is insensitive to moisture and water, and thanks to the softcase (protective cover), is safe from impact damage and dirt. After cleaning under running water, you stow the probe directly in the softcase, bringing your working day to a relaxed close.

testo 108

- Waterproof temperature measuring instrument
- Plug-in standard penetration probe Type T or K
- Softcase

testo 108-2

- Waterproof temperature measuring instrument
- Screw-in thermocouple probe Type T
